Goals

Make meaningful work and never stop learning.

Toolkit & Skills

Exercised often:

HTML5	Bootstrap	JavaScript	Selenium
CSS3 (incl. LESS and SASS)	Backbone	jQuery	PHP
Adobe Photoshop	Ember	Node.js	Git

Familiar (learned in the past, but used less frequently now):

Python	MySQL	Arduino
Django	Jasmine	
Graphical libraries (D3, Paper.js, Processing)		

Work Experience

Scripto, web developer and designer

January 2011 - Present

Scripto is a web-based television production software built using Node.js. Originally hired as a JavaScript developer, my role has grown to include design and UX for the product. Born out of *The Colbert Report*, we now support *Last Week Tonight*, *The Nightly Show*, and *The Daily Show*.

ScriptEd, volunteer instructor

September 2014 - Present

I teach front-end development to high school students as part of a program called ScriptEd, which brings tech opportunities to under-resourced schools.

Freelance Web Developer

September 2006 - Present

Varies per project, but typically I handle both front and back-end development, as well as providing design guidance for my clients.

Reuters, design technologist

May 2012 - August 2013

Worked with designers to prototype new features and user interactions using a variety of tools including Ember and Backbone. Worked on the new CMS and consumer-facing website for Reuters Next, written in Python.

Yelp, front-end web developer

September 2008 - January 2011

I wrote CSS, JavaScript, and Python for Yelp.com. Also spearheaded the Yelp styleguide, setting standards for all front-end code.

Education

New York University

MPS, Interactive Telecommunications Program

UCLA

BA, Economics

Strala Yoga, NY

200-hour yoga teacher certification
